

## CASE STUDY

Project: Earls Court Station Refurbishment  
Project value: £4.05 million  
Client: Metronet Rail SSL  
Main Contractor: Cleshar Contract Services Ltd  
Dates: August 2000 - December 2004

### Background

As part of London Underground's commitment to modernising the network, essential refurbishment work was carried out at Earls Court Station to create a safer and more accessible environment for the travelling public.

Giffen Group secured its contract on competitive pricing combined with extensive experience gained from similar projects.

### Scope of work

The project, which entailed completing works on the District and Central line ticket hall, District and Central line platforms, the Warwick Road exit and high level walkway, was completed to time and on budget, despite a demanding programme.

Giffen Group provided both electrical and security & communications services which included the following disciplines:

#### Electrical Services:

- Mains switchgear and distribution (manufactured by Giffen Switchgear)
- Sub-mains cabling
- Lighting and small power
- Cable containment.

#### Communications Security & Security installation:

- Fully integrated system incorporating
- CCTV
- Help points
- Public address
- Telephones
- Long line telephone system.
